CLAUDE · NEW ON 10 NOVEMBER 2026

Claude Sheets & Whiteboards the first guide

Build working spreadsheets and visual plans just by asking — then edit them with your team. What's verified, who gets it, step-by-step setup, 10 ready-to-use prompts, the limits, and where Claude Meetings stands.

144
spreadsheet functions in Claude Sheets

100,000
cells per sheet — the size limit

Pro+
Sheets & Whiteboards: beta on paid plans only

Facts from Anthropic's launch article and Help Center, checked 12 Nov 2026

youtube.com/@DigitalPathshalabyAaryaman

What launched, and who can use it

On 10 November 2026 Anthropic added new kinds of **artifacts** to Claude: things Claude makes that you can keep, edit and share. Two of them are brand new for office work.

Tool	What it is	Status (12 Nov 2026)
Claude Sheets	"A spreadsheet built into Claude." You and Claude edit the same cells, with formulas across tabs	Beta · Pro, Max, Ultra, Team, Enterprise
Claude Whiteboards	A shared board to work through ideas with Claude and your team	Beta · Pro and higher
Claude Data	Dashboards and data stories from connected data platforms (formerly Dashboards)	Pro and higher; needs a data connector
Claude Meetings	Claude joins a call to take notes and update your documents	Anthropic: **"coming soon"**. TechCrunch reports a Team/Enterprise beta on Google Meet

By plan

Plan	Docs · Slides · Design	Sheets · Whiteboards	Data
Free	✓	×	×
Pro / Max / Ultra	✓	✓ beta	✓
Team	✓	✓ beta, on by default	✓
Enterprise	✓	✓ beta, off until an owner enables it	✓ (on by default from 19 Nov 2026)

In India: Sheets and Whiteboards are on paid plans only, as everywhere. On the Free plan you'll see Docs, Slides and Design, not Sheets or Whiteboards.

Sources: Claude, "More ways to work with Claude: Sheets, Whiteboards and interactive connectors", 10 Nov 2026; Claude Help Center, "What are artifacts and how do I use them?" and "Get started with Claude Sheets"; TechCrunch, 10 Nov 2026.

1 Switch it on and find it

Two settings and three ways in.

One setting first

Artifacts need **Create and edit files** (formerly "Cloud code execution and file creation"). Turn it on in `Settings → Capabilities`. On Team and Enterprise, an owner turns it on in `Organization settings → Capabilities`.

Three ways to start a sheet or a board

1 · Just ask
In any chat: "Make me a sheet to track..." or "Start a whiteboard to plan..."

2 · Output button
Select **Output** in the message box and choose a template.

3 · Artifacts tab
Open the **Artifacts** tab in the sidebar and pick the **Sheets** or Whiteboard tile.

Where things are saved

Everything you make is saved in the **Artifacts** tab in your sidebar. Sheets and boards start **private to you**; click **Share** to invite others.

Which device

Platform	Sheets	Artifacts in general
Web and Desktop	Full support	Create, edit, share, use templates
Mobile apps	**Basic read-only**	Create, edit and view; change sharing on web or Desktop

ENTERPRISE AND TEAM ADMINS

Sheets and Whiteboards are on by default for Team and off for Enterprise. Owners control them in `Organization settings → Artifacts` (Artifact templates), and custom roles can enable Sheets for part of the organisation.

Source: Claude Help Center, "What are artifacts and how do I use them?" and "Get started with Claude Sheets".

2 Claude Sheets: what it can and can't do

Light, shared spreadsheets — built by asking.

Video	Upload date	Status	Views
01 How to use ChatGPT	16-Nov	Scheduled ▾	—
02 Salary sheet	18-Nov	Draft ▾	—
03 ChatGPT for teachers	20-Nov	Draft ▾	—
Total scheduled		**=COUNTIF(C2:C4,"Sche**	**1**

← Claude's edit, outli

Illustration of the idea, not an actual screenshot.

IT CAN

- Add tabs and write **cross-tab formulas**
- Formatting and conditional formatting
- Dropdowns, checkboxes and charts (bar, line, pie and more)
- **144 functions**; formulas stay in the cells so you can check them
- Answer questions about a selected range
- Comments on cells; version history with restore
- Live co-editing with teammates and Claude

NOT YET / NOT SUPPORTED

- Not yet: pivot tables, protected ranges, find and replace, multi-column sort, filter views, multi-select dropdowns, PDF export
- Not supported: macros, VBA, Power Query, DAX, print layout
- No live data from connected apps
- Max **100,000 cells** per sheet
- Not yet for HIPAA, CMEK or zero-data-retention setups

Getting data in and out

Direction	Options
Import	CSV, Google Sheets, Excel, or a blank sheet; or paste from Excel / Google Sheets
Export	.xlsx or CSV; "Send to" partner apps

Anthropic's own advice: use Sheets for light, shared sheets. For files that already live in Excel or Google Sheets, use Claude for Excel, Claude for Google Workspace, or export.

Source: Claude Help Center, "Get started with Claude Sheets".

3 Build your first sheet in 5 minutes

Example: a YouTube upload tracker.

1. Open a new chat (or Artifacts → **Sheets**).
2. Describe the **purpose** and give **your own numbers or rows** — Anthropic's tip for better sheets.
3. Watch Claude build it; each change is **outlined** as it lands.
4. Click any number to see its formula. Type straight into cells to edit.
5. Select a range and ask Claude about it ("Which videos are late?").
6. Made a mistake? Open **version history** and restore. (Restoring removes edits made after that version.)
7. Click **Share** to invite a teammate, or export to .xlsx.

READY-TO-USE PROMPT · UPLOAD TRACKER

```
Make a sheet to track my YouTube uploads.
Tab 1 'Plan': columns Video no, Title, Upload date (DD-MM-YYYY), Status
(dropdown: Idea, Scripted, Recorded, Edited, Scheduled, Live), Views.
Tab 2 'Summary': count of videos per status and a bar chart of it, using
formulas that read from Tab 1. Highlight in red any row whose upload date
has passed but status isn't Live. Here are my first 4 rows: [paste]
```

Check before you trust it

- ✔ Click 3 calculated cells and read the formula.
- ✔ Change one input and see that totals update.
- ✔ Export to .xlsx and open it once in Excel if the sheet will be used there.

Steps and tips: Claude Help Center, "Get started with Claude Sheets". The prompt is our example.

4 Five ready-to-use Sheets prompts

Copy, fill in the brackets, paste.

1 · MONTHLY OFFICE BUDGET

```
Make a monthly budget sheet: tab 'Expenses' with Date, Category (dropdown: Rent, Salaries,
Utilities, Travel, Supplies, Other), Amount (₹), Paid (checkbox). Tab 'Summary' with totals by
category, a pie chart, and budget vs actual with red when over. Budget per category: [list].
```

2 · ATTENDANCE TRACKER

```
Create an attendance sheet for [n] staff for [month]: one row per person, one column per working
day with a dropdown P / A / L / H. Add totals for each code per person and a column for attendance
%. Conditional formatting: red below 80%.
```

3 · LEAD / ENQUIRY TRACKER

```
Build a lead tracker: Date, Name, Source (dropdown: WhatsApp, Call, Walk-in, Instagram),
Requirement, Follow-up date, Stage (dropdown: New, Contacted, Quoted, Won, Lost). Summary tab:
leads per source and win rate, with a bar chart.
```

4 · STOCK / INVENTORY LIST

```
Make an inventory sheet: Item, Unit, Opening stock, In, Out, Closing stock (formula), Reorder
level, and a 'Reorder' checkbox that ticks itself when closing stock is below the reorder level.
Add a summary of items to reorder.
```

5 · CLASS / TRAINING PLANNER

```
Create a 4-week training planner: Week, Day, Topic, Trainer, Duration (hrs), Status (dropdown). Add
a summary of total hours per trainer and per week, and a line chart of hours by week.
```

Tip: keep each sheet under the 100,000-cell limit. For big data, analysis in Excel or Google Sheets is still the right tool.

5 Claude Whiteboards

Talk through a messy plan; Claude lays it out on a board your team can edit.

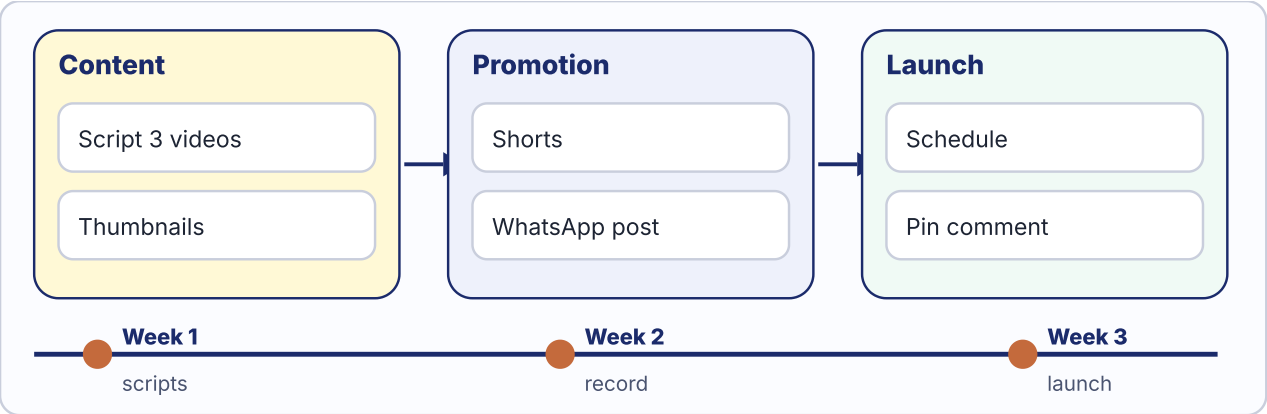

Illustration of the idea, not an actual screenshot.

What Claude does on the board

- ✔ Turns a messy list of ideas into groups, flows and timelines
- ✔ Groups similar ideas and finds themes; expands or refines a selected area
- ✔ Turns a spoken plan into steps with owners and deadlines
- ✔ Lets several people add ideas and ask Claude to reorganise
- ✔ Converts a finished board into a **doc or a slide deck**
- ✔ Sends boards to **Miro** and **Lucid**

Start one

1. In a chat, type: *"Start a whiteboard to plan [project]"*, or open the Artifacts tab and choose the Whiteboard tile.
2. Dump your ideas in any order, typed or pasted.
3. Ask Claude to group them, order the steps and add a timeline.
4. Share it so teammates can edit live.
5. When it's done, ask for a doc or a deck from the board.

LIMITS REPORTED FOR LAUNCH

Boards can't use context from connected apps yet, so paste key facts in. Long sessions count toward usage limits. Export options are limited (image and partner apps).

Sources: Claude launch article, 10 Nov 2026; Claude Help Center, artifacts article; TechCrunch, 10 Nov 2026; Tom's Guide, 11 Nov 2026; launch-limit details via Justin McKelvey's guide, which cites the Claude Help Center (12 Nov 2026).

6 Whiteboard prompts and the idea-to-tracker chain

One idea, carried through every artifact without retyping.

1 · PLAN A PROJECT

```
Start a whiteboard to plan [project]. Here are my rough notes: [paste].
Group them into phases, order the steps, and add a timeline with an
owner and deadline for each step. Mark anything that's missing with '?'.
```

2 · TEAM RETRO

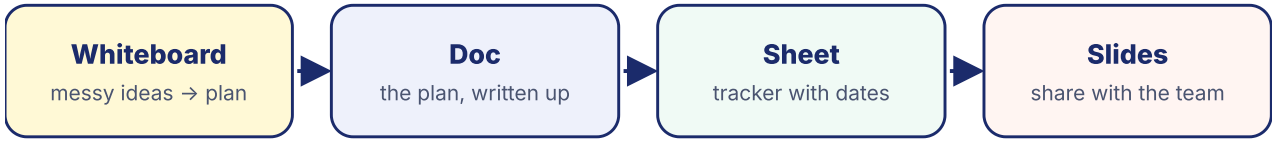

```
Start a whiteboard for our retro on [project]. Make three sections:
Went well, Didn't go well, Try next time. Sort these points into them and
merge duplicates: [paste points]. Then suggest 3 action items.
```

3 · CONTENT PLAN

```
Start a whiteboard for next month's content. Ideas: [paste]. Group them
by theme, put them on a 4-week timeline with 3 posts a week, and mark
which ones need a video, a carousel or a short post.
```

The chain (Anthropic's own example)

Anthropic describes carrying an idea "from a whiteboard to a spreadsheet to a dashboard" without restating details. A practical version:

4 · BOARD → TRACKER

```
Turn this whiteboard into a Claude Sheet: one row per task with Phase,
Task, Owner, Deadline (DD-MM-YYYY), Status dropdown, and a summary tab
counting tasks per status. Then make a 5-slide deck summarising the plan.
```

Chain description: Claude launch article, 10 Nov 2026. Prompts are our examples.

7 Claude Meetings: what's announced

Coming soon. Here's what we know.

Question	What the sources say
What it does	Claude joins a call to take notes and update the documents your team is working on during the conversation (Anthropic). In the call it can draft the plan, map a timeline on a whiteboard, answer chat questions and pull information from connected apps; notes and action items appear in claude.ai afterwards (TechCrunch)
Status	Anthropic's launch article: **"Coming soon."** TechCrunch: beta on **Team and Enterprise**
Which app	Google Meet at launch (TechCrunch); Zoom not mentioned
Privacy behaviour	Claude shows as a participant and posts a notice in the meeting chat; it won't join calls with external guests unless an admin allows it, and leaves if an external guest joins (TechCrunch)
Pro users in India	Not available to individual plans yet

Until then: paste a meeting transcript or your notes into a chat and say *"Start a whiteboard from these notes with decisions, owners and deadlines"*. That gives most of the result today on Pro.

8 Claude Data, in one paragraph

For teams with a data warehouse or CRM.

Claude Data (formerly Dashboards) builds dashboards, data stories and narrated short videos from connected platforms such as Snowflake, BigQuery and Salesforce. Each chart shows the query behind it and when it was last refreshed. It's on Pro and higher but needs a compatible data connector, so for most small offices Sheets is the place to start.

Sources: Claude launch article, 10 Nov 2026; TechCrunch, 10 Nov 2026; Claude Help Center (artifacts); Tom's Guide, 11 Nov 2026.

Privacy, limits and which tool to use

Before you put real data in

- Sheets and boards start **private**. Once shared, everyone with access sees the content.
- Anthropic warns that **shared storage is visible to everyone using the artifact**: check it before entering sensitive data.
- Connected apps use each person's own accounts, even on shared artifacts (owners can turn this off on Team/Enterprise).
- Beta: not yet for HIPAA, CMEK or zero-data-retention setups.
- Sheets and boards count toward your plan's usage limits.
- For personal or client data, follow your organisation's policy (see our *PDF to Excel* ebook on India's DPDP Act).

Claude Sheets, Excel or Google Sheets?

If you need…	Use
A quick tracker, budget or plan built by asking, shared with a few people	**Claude Sheets**
Pivot tables, Power Query, macros, printing, very large data	**Excel**
A file your whole office already edits in Google Drive	**Google Sheets** (with Claude for Google Workspace)
To brainstorm a plan, then turn it into tasks	**Claude Whiteboards** → Sheets

Your first week

Day	Try
1	Turn on "Create and edit files"; build the upload tracker (page 5)
2	Import a small CSV and ask questions about a selected range
3	Use one of the five Sheets prompts on real (non-sensitive) work
4	Start a whiteboard from your rough notes for one project
5	Share the board with a colleague and edit it together
6	Run the board → tracker → deck chain
7	Export the sheet to .xlsx and check it in Excel
